

ONLINE EDUCA MADRID

7th International Conference on Technology Supported Learning and Training

The meeting point between Europe and Latin America
Hotel NH Parque Avenidas Madrid • May 7 - 9, 2007

Press information

08.03.2007

Active participation of Latin America at the 7th Online Educa Madrid

Brazil, Colombia, Mexico, Venezuela and Chile will actively take part at the Online Educa Madrid 2007 conference and parallel exhibition. Organizations and institutions from these countries will come to the event to learn about the latest innovations in the industry while networking for partnerships and holding meetings with companies and organizations to strike business agreements. Special mention should be given to the group of institutions under the lead of the Brazilian government who are currently implementing e-learning solutions.

Universities, organizations and governments from Argentina, Peru, Panama, Dominican Republic, Ecuador, Bolivia, Guatemala, Nicaragua, Costa Rica, Puerto Rico and Uruguay will, once again, meet at this annual conference. Like in previous occasions, strong delegations from Spain and Portugal will be represented, but also from France, Great Britain, Denmark, Italy, Korea and Germany.

Moreover, several companies and institutions from the U.S.A. have come to realize that Online Educa Madrid has become the key e-learning event for the Iberian Peninsula and Latin America. They have, therefore, chosen to take advantage of this opportunity to open their doors to the Spanish speaking e-learning market.

About Online Educa Madrid

Online Educa Madrid is one of the largest international conferences on technology supported learning and training in the Spanish-speaking world. Online Madrid delegates are high-level decision makers from education, business and government – the three key areas driving e-learning adoption and innovation – making it the most important networking venue for experts, practitioners and newcomers.
